Patents Act 1977

Combined Search and Examination Report under Sections 17 & 18(3)

Allowance of the divisional date

1. Your request that this application be treated as having been filed on 13 August 2002, which is the same date of filing as your earlier application number GB0406258.4, has been allowed.

Clarity and consistency

2. The original claims on pages 78-125 should be deleted.
3. The cross references to related applications on page 1 would appear to be redundant.
4. Inconsistencies between pages 2-15 and 59-72 and the claims should be removed.
5. The last paragraph on page 72 obscures the true scope of the claims.

Non-metric units

6. The equivalent metric values should be given alongside the non-metric values mentioned on pages 34,42 and 53 of your specification.

The title of the invention

7. The title of your specification does not clearly indicate the nature of your invention. I suggest "Apparatus for radially expanding an expandable tubular member" would be a better title.

Publication

8. Publication is proceeding concurrently.
